MOSES KOROMA

+1 (571) 314-8920 | s576958@nwmissouri.edu | Woodbridge, VA, USA | LinkedIn | GitHub

EDUCATION

Wheeling Jesuit University **May 2024**
Bachelor's, Business
- Management Information Systems Concentration | Dean's List Recipient

Northwest Missouri State University **Jun 2026**
Master's, Data Analytics

EXPERIENCE

Northwest Missouri State University **Maryville, MO, USA**
Student Data Analyst *Aug 2024 - Present*
- Analyzed datasets of over 6,000 student records to identify trends in enrollment, retention, and academic performance, supporting strategic decision-making.
- Designed and implemented interactive dashboards using Tableau, Power BI, and Excel, reducing reporting time by 30% and enabling leadership to monitor 12 KPIs in real-time.
- Conducted statistical analyses and survey feedback analysis, contributing to a 10% increase in retention rates and a 20% improvement in student satisfaction scores.

Wheeling Jesuit University **Wheeling, WV, USA**
Student IT Assistant *Nov 2020 - Jan 2024*
- Manage daily help desk operations, including ticket prioritization, tracking, and prompt resolution for over 200 staff members, more than 300 faculty members, and over 3,000 students."
- Perform a thorough analysis of technical issues to identify root causes and implement solutions, resulting in a 50% reduction in response time to customer complaints and a 30% increase in overall customer satisfaction.
- Managed multiple projects simultaneously using organizational, analytical, and Excel skills.

PROJECTS

NYC Temperature Prediction | Python, Pandas, NumPy, Seaborn, Matplotlib, SciPy, Scikit-learn - *Link to project*
.
- Built predictive models for NYC high temperatures using historical data from 1895-2018, comparing SciPy's linear regression and Scikit-learn's linear regression for accuracy and scalability.
- Enhanced model training with data preprocessing by cleaning and transforming data for robust analysis, reducing prediction error.
- Evaluated model performance by splitting data into training and testing sets, achieving improved prediction accuracy and reducing overfitting.
- Visualized temperature trends and model predictions through Seaborn and Matplotlib, providing insightful visual summaries for future forecasting.

NYC Traffic Crashes Analysis | Python, SQL, Pandas, Matplotlib, Seaborn, Folium - *Link to project*

- Conducted exploratory data analysis (EDA) on NYC motor vehicle crashes to identify high-risk zones, peak crash times, and behavioral contributing factors.
- Implemented time series analysis and forecasting to analyze crash trends and provide data-driven recommendations for public safety improvements.
- Integrated traffic volume and weather data from APIs to analyze external influences on crash severity and frequency.
- Developed interactive visualizations using Python libraries (Pandas, Seaborn, Matplotlib, and Folium) to map crash hotspots and borough-specific crash trends.

IMDB Dataset Exploratory Data Analysis | Python, Pandas, Seaborn, Matplotlib, Jupyter Notebook - *Link to project*

- Conducted comprehensive exploratory data analysis on the IMDB dataset to identify trends, top-rated movies, and popular genres.
- Analyzed director and actor performance and their impact on movie ratings and popularity.
- Developed visualizations using Seaborn and Matplotlib to effectively communicate insights.
- Documented findings and analysis process in a detailed Jupyter Notebook for presentation and future reference.

TECHNICAL SKILLS

Programming Languages & Tools: Python, SQL, Jupyter Notebook, Google Colab, GitHub, Excel, R
Machine Learning & Statistics: Regression, Clustering, Correlation Analysis, Forecasting, Scikit-learn
Data Analytics & Visualization: Power BI, Matplotlib, Seaborn, Folium
Geospatial Analysis: Folium, Plotly, Crash Heatmaps, GIS Mapping
